Cairo, Egypt

OBJECTIVE

Junior full-stack developer and Data Science trainee with a CS/AI foundation, combining MERN-stack and Python experience to build data-driven, production-quality applications. Seeking to apply this foundation as an AI & Software Engineer.

EDUCATION

- **Misr International University** Cairo, Egypt
Bachelor of Science in Computer Science; GPA: 3.3 *Sep. 2024 – Present*
 - **Relevant Coursework:** Web Development, Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems.

EXPERIENCE

- **Full Stack Web Developer Intern** El Zatuna
Internship *Jul. 2026 – Present*
 - **Development:** Building the company's Intern Management System (MERN stack) with the engineering team, covering intern workflow and tracking features.
- **Data Science Trainee** Digital Egypt Pioneers Initiative (DEPI)
AI & Data Science – Data Scientist Track *Jul. 2026 – Present*
 - **Training:** Applying Prompt Engineering, Python, SQL, and Data Visualization through hands-on CRISP-DM projects, including an in-progress capstone deployed as a live application with dashboard.

PROJECTS

- **Van Der Linde – MERN E-Commerce Platform:** Led a group of 5 and built a production Full-stack luxury watch e-commerce platform featuring a 3D watch configurator, an admin dashboard for product and order management, and a customer support chatbot. **Technologies:** React 18, Node.js, Express.js, MongoDB, JWT, Multer.

- **MIU Guide – MIU University Platform:** Redesigned a university platform with a 3D campus map, GPA calculator, and attendance tracker. **Technologies:** React.js, CSS Modules, Framer Motion, Model-Viewer.
Links: [GitHub](#) — [Live](#)
- **Generalized Tic-Tac-Toe Solver – Algorithms Analysis & Design:** Computes optimal moves on any NxN board using game-tree search and memoization with transposition tables. **Technologies:** C++, Minimax, Dynamic Programming.
Links: [GitHub](#) — [Live](#)
- **E-Commerce Management System – OOP:** Desktop app with Admin, Seller, and Customer roles built on a layered architecture with file-based persistence. **Technologies:** Java 11+, JavaFX, OOP.
- **Intern Management System – MERN Stack (In Development):** Internship project at El Zatuna to manage intern workflows and tracking. **Technologies:** MongoDB, Express.js, React.js, Node.js.

TECHNICAL SKILLS

- **Web Development:** React.js, Node.js, Express.js, MongoDB, Mongoose, Vite, Axios, React Router, Context API, Framer Motion, MySQL
- **Languages:** JavaScript, C++, Java, Python, SQL, HTML, CSS
- **AI & Machine Learning:** AI Basics, Prompt Engineering, NLP Basics, LLM API Integration
- **AI Tools & Agent Systems:** Antigravity, Claude, Multi-Agent Systems, Claude Hooks, Skills, AI Workflow Orchestration
- **Additional Skills:** JavaFX, Qt, Arduino, Git, GitHub, Jira

EXTRACURRICULARS

- **MSP Tech Club – Software Development Co-Head** Misr International University
Student Club Co-Head Sep. 2026 – Present
 - **Leadership:** Co-lead the club’s software development track, guiding project direction and mentoring members through Git-based collaborative workflows.
- **ECPC – Contestant** Team: "Trial and Error"
ECPC Egyptian Collegiate Programming Contest Aug. 2026
 - **Contest:** Took part in a one-day competitive programming competition, solving algorithmic problems as part of a three-person team ("Trial and Error"). Practiced problem analysis, time-boxed implementation, and collaborative debugging under contest conditions.

LANGUAGES

- **Arabic:** Native — **English:** Fluent
